## Medisys Now Offering Billing Services to help you reduce costs

After much discussion with existing and potential clients and our partners at McKesson and Gateway we have decided to add medical billing to our list of services. We are currently providing quotes to prospective billing clients and have invited a very experienced professional to join our company to head up our billing department.

Our billing department will be using Medisoft, of course. We are currently quoting billing services at 5.4%. Billing clients will receive discounts on other Medisys products and services as well.

If you wish to add Cloud Computing and the new McKesson Practice Choice EHR you can further reduce your costs.

## What you need to know about PQRS

- PQRS was originally known as PQRI. Since 2010 providers could bill codes to Medicare to indicate that they had performed quality measures specific to their specialty during patient encounters.
- Providers that didn't provide qualifying data in 2013 are penalized 1.5% of their Medicare payments in 2015.
- Providers that didn't provide qualifying data in 2014 can still qualify through a 3rd party website until February 28 at a cost of $299 per provider to avoid the 2% penalty to be assessed in 2016.
- For 2015 providers can qualify for PQRS automatically by attesting to meaningful use Stage 2 in January of 2016. This will prevent the 2017 penalty.
- To learn more about PQRS go to the newsletter archive on our website medisyswv.com and review the newsletter from Feb 2014.

Although it is too late to submit PQRS data for 2013, the deadline for 2014 is February 28, 2015. This will stop the penalty assessment of 2% in 2016. Please call our office if you need help or have questions.

For those of you who are using the Medisoft Clinical EHR and attesting to Stage 2 for 2015, your PQRS attestation will be done through the EHR. You will need to review your clinical quality measures for PQRS in addition to the CQM for EHR that you do now.

# There is a Lot Going on at Medisys Practice Solutions

In addition to the rush to assist our clients with PQRS and meaningful use attestation prior to the February 28 deadline, we are moving ahead with our new suite of products and services. Our new website signals the beginning of our expanding marketing efforts.

## Medisys Launching a New Website

Within a few weeks Medisys will be launching a new website. The purpose is to provide a more professional internet presence to practices that are shopping online as well as to promote our new products and services. It will be mobile device friendly.

## Medisys to Offer McKesson "Practice Choice" EHR

McKesson has developed a new state of the art EHR. It is available only on the McKesson cloud for a monthly fee. Support, upgrades, automatic daily backups and maintenance are all included. No server needed at your office. No service interruptions for backups and monthly maintenance service. The Medisoft billing system is fully integrated as well.

---

# Also From Medisys - Reduce Your Costs and Improve Security

**Patient Portal Server** - Reduce the cost of adding a separate server for Patient Portal to meet Stage 1 (2014 Rules) and Stage 2 rules to just $499.

**Unified Threat Management System**. - Secures your office systems from threats from outside and misuse of the internet from inside your practice. Helps you meet HIPAA compliance. Installed and custom tailored to your practice. $960. Add Optional Medisys monitoring service for $20/month.

**Cloud Processing** - Get rid of that server that needs replaced every few years. Eliminate the need to do monthly maintenance. No more monthly support costs No more upgrade fees and disruptions for upgrades. Save staff time and the uncertainty of doing your own backups. Run your existing Medisoft billing and EMR systems on the Medisys Private Cloud and reduce your costs and complexity. You can keep your Quickbooks and other Apps at your office or run them on our cloud if your wish. No set-up charges.Your Medisoft upgrades can be included in the package. Call for a quote!

**Revenue Management Services** - **Fully electronic billing** by our expert staff. We utilize the services of Gateway EDI and Billflash in addition to Medisoft practice management. Our billing service runs on our private cloud so you can use the appointment scheduler and Medisoft from your office. We review your financial progress every month in person with you..
